

# Gas supply status report

As at: 30 April 2022

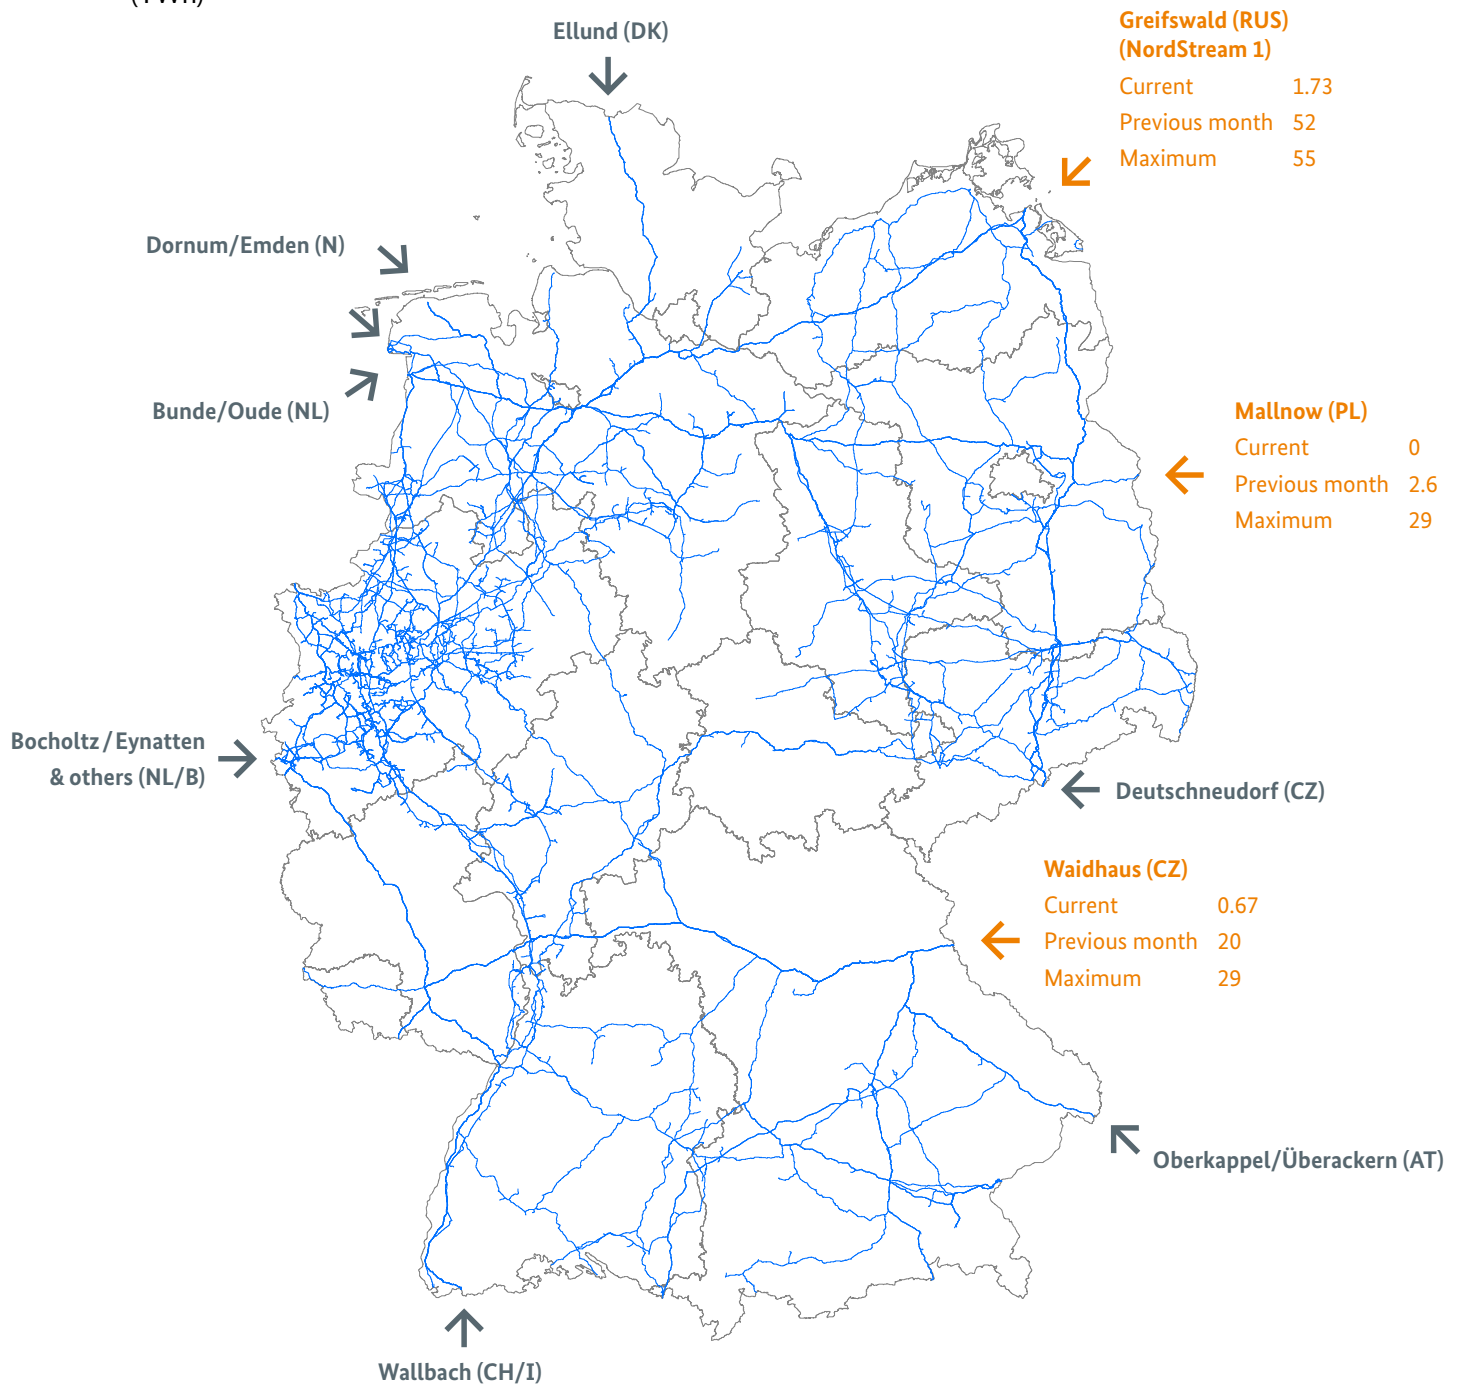

- The security of supply in Germany is currently safeguarded.
- The halting of Russian gas deliveries to Poland and Bulgaria has thus far had no impact on the security of supply in Germany.
- Gas flows to Germany are at a normal level.
- According to information on hand, the supply situation in Poland and Bulgaria is stable because both countries are able to use other sources of supply at present. Neither country is declaring the early warning level (in the context of the emergency plan for gas), which also indicates that the supply situation is currently secure. In addition, no solidarity measures (under the EU SoS Regulation) are being requested at present.
- The Bundesnetzagentur is monitoring the situation very closely.
- Storage facilities are currently filled to levels comparable with those in 2017 and now significantly higher than in spring 2015, 2018 and 2021.

## 1. Delivery situation from Russia

### Gas flows from Russia (GWh/day)

## Gas flows from Russia (TWh)

### Legend

Overview of the major German cross-border interconnection points

Interconnection points for natural gas from Russia with gas flow data

Interconnection points for natural gas from other European countries without gas flow data

**Current:**

Gas delivered in 24 hours from 6am of the previous day to 6am of the current day (TWh/day)

**Previous month:**

Gas delivered in the previous calendar month (TWh/month)

**Maximum:**

Technical capacity (TWh/month)

Gas transmission lines in Germany

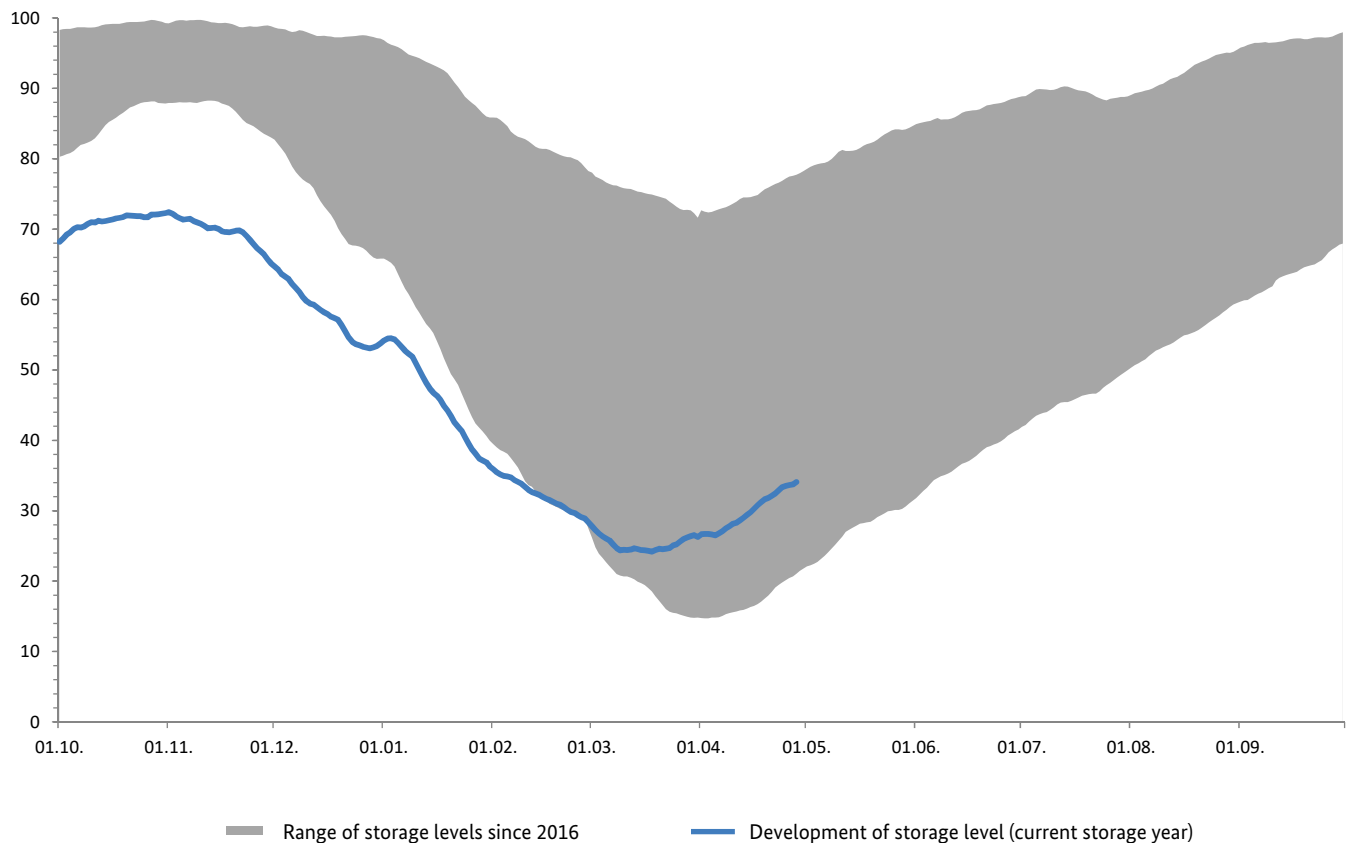

The German gas network is about 511,000 km long.

## 2. Storage levels

- More gas is being injected into storage than withdrawn from it overall.
- 28 April 2022: 81.63 TWh (34.05%)  
[18 March 2022: 58.88 TWh (24.2%), 1 March 2022: 67.57 TWh (27.8%), 1 February 2022: 87.37 TWh (35.9%)].
- Since 18 March 2022, more gas has been injected into storage than withdrawn from it overall.
- Current storage levels are comparable with those in 2017 and now significantly higher than in spring 2015, 2018 and 2021.

### Development of storage levels in Germany<sup>1</sup>

(%)

<sup>1</sup> Graph only shows levels of storage facilities located in Germany.

## Gas storage levels in Germany: daily storage level and change in storage levels (percentage points)

Please note that the status report refers solely to the supply of gas. No conclusions can be drawn from it as to the availability of other energy sources such as crude oil and fuels.
