

# Gas supply status report

As at: 1pm, 15 August 2022

- Since 23 June 2022 the alert level of the gas emergency plan has been in place.
- The situation is tense and a further worsening of the situation cannot be ruled out. The gas supply in Germany is, however, currently stable. At present, the security of supply in Germany continues to be safeguarded.
- Gas flows from Nord Stream 1 are currently at about 20% of maximum capacity.
- Gas continues to be injected into storage. The total storage level in Germany is 76.11%. The storage level at the Rehden facility is 54.76%.
- Wholesale prices are still at a very high level as a result of the latest reduction in supply.
- Companies and private consumers must expect a considerable increase in gas prices.

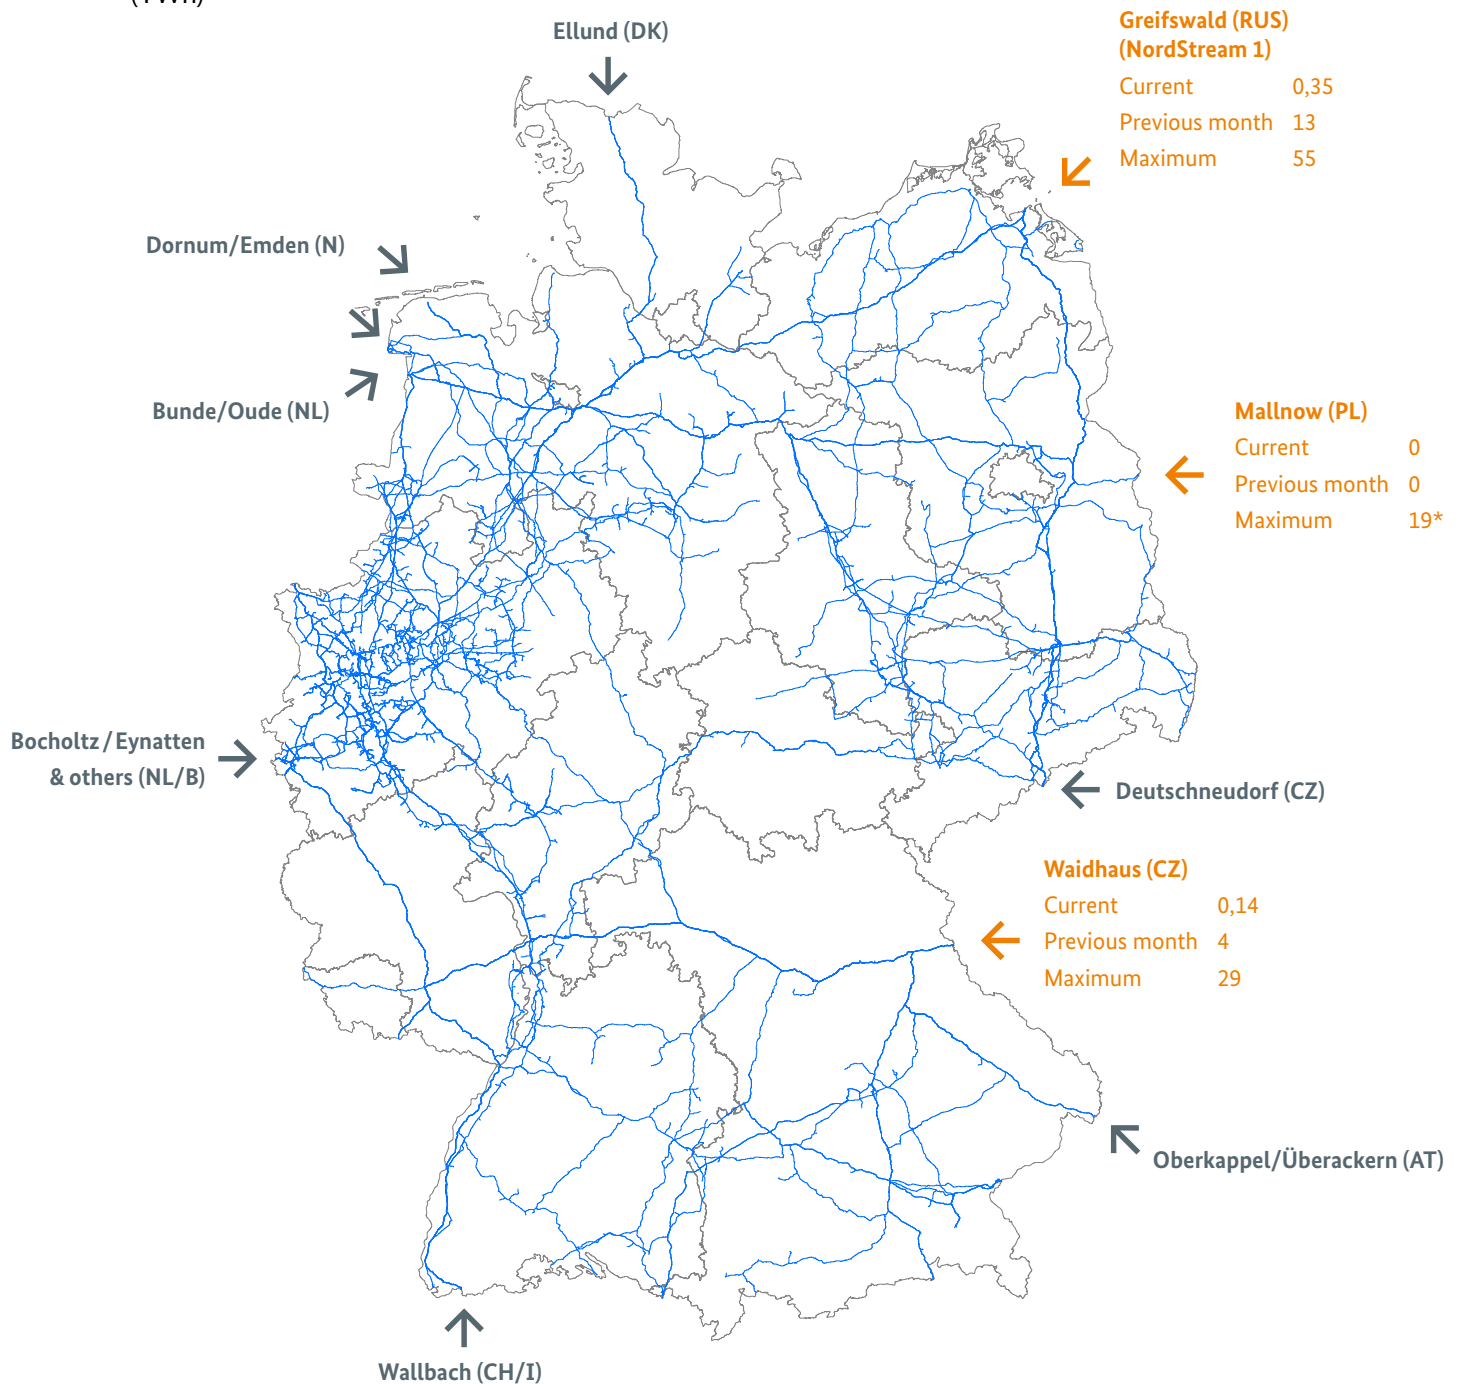

## 1. Delivery situation from Russia

### Gas flows from Russia

(GWh/day)

## Gas flows from Russia (TWh)

### Legend

Overview of the major German cross-border interconnection points

Interconnection points for natural gas from Russia with gas flow data

Interconnection points for natural gas from other European countries without gas flow data

**Current:**

Gas delivered in 24 hours from 6am of the previous day to 6am of the current day (TWh/day)

**Previous month:** Gas delivered in the previous calendar month (TWh/month)

**Maximum:** Technical capacity (TWh/month)

Gas transmission lines in Germany

The German gas network is about 511,000 km long.

\* Reduction from 29 to 19 due to capacity relocation by the gas transmission system operators (TSOs)

## Gas flows from Norway, the Netherlands and Belgium (GWh/day)

## Gas imports to Germany (GWh/day)

## 2. Storage levels

- Gas continues to be injected into storage.
- 13 August 2022: 185.03 TWh (76.11%) [1 August 2022: 168.71 TWh (69.43%), 1 July 2022: 149.3 TWh (61.5%), 1 June 2022: 118.9 TWh (49.5%), 1 May 2022: 84.5 TWh (35.5%)].
- Since 18 March 2022 more gas has been injected into storage than withdrawn from it overall.
- Current storage levels are in some cases significantly higher than in 2015, 2017, 2018 and 2021.

### Development of storage levels in Germany<sup>1</sup>

(%)

<sup>1</sup> Graph only shows levels of storage facilities located in Germany.

### Gas storage levels in Germany: daily storage level and change in storage levels (percentage points)

### 3. Consumption of natural gas

#### Monthly consumption of natural gas in Germany (TWh/month)

\* Gas consumption is updated monthly; the figures are considered provisional until the following month.

## 4. Wholesale gas prices

Product	Current prices/values	Change from av prices/values of prev day	Av price 2022 up to 23.02.22	Change from av pre-crisis price	As at	Source
<b>Gas [€/MWh]</b>						
Day-Ahead DE (THE)	200.13	-0.4%	81.18	146.5%	12.08.2022 18:45	EEX
Future September/22 NL (TTF)*	206.11	-1.0%	74.33	177.3%	12.08.2022 18:00	ICE
Future Q4/22 DE (THE)	214.20	-0.6%	76.08	181.6%	12.08.2022 18:45	EEX
Future Year/23 DE (THE)	195.42	0.0%	50.65	285.9%	12.08.2022 18:45	EEX

\* Price change overnight

### Gas price THE, DE (daily settlement prices) (€/MWh)

Please note that the status report refers solely to the supply of gas. No conclusions can be drawn from it as to the availability of other energy sources such as crude oil and fuels.

Here you can find a description of market instruments that can help to reduce industrial gas consumption:
