

Gas supply status report

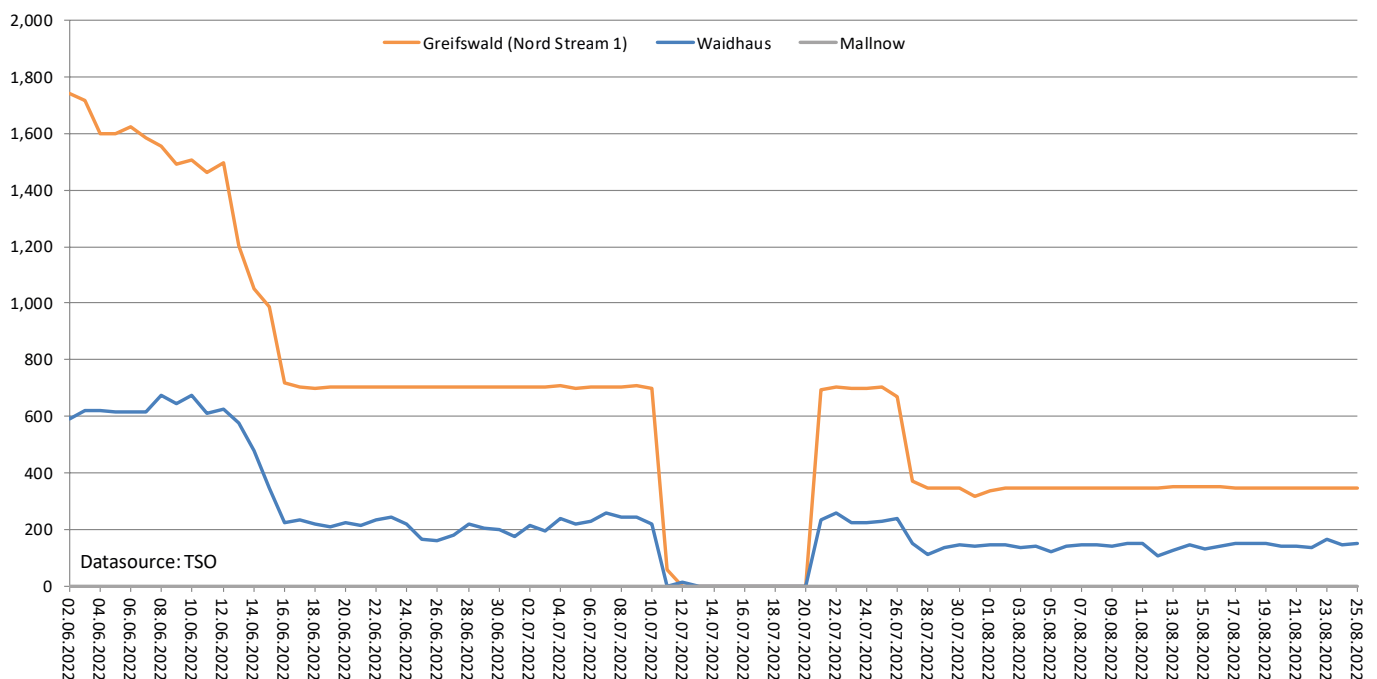

As at: 1pm, 29 August 2022

- Since 23 June 2022 the alert level of the gas emergency plan has been in place.
- The situation is tense and a further worsening of the situation cannot be ruled out. The gas supply in Germany is, however, currently stable. At present, the security of supply in Germany continues to be safeguarded.
- Gas flows from Nord Stream 1 are currently at about 20% of maximum capacity.
- Gas continues to be injected into storage. The total storage level in Germany is 82.74%. The storage level at the Rehden facility is 65.54%.
- Wholesale prices have risen sharply recently and continue to be at very high levels.
- Companies and private consumers must expect a considerable increase in gas prices.

*Total gas consumption of interval-metered industrial customers

Change in consumption of industrial customers

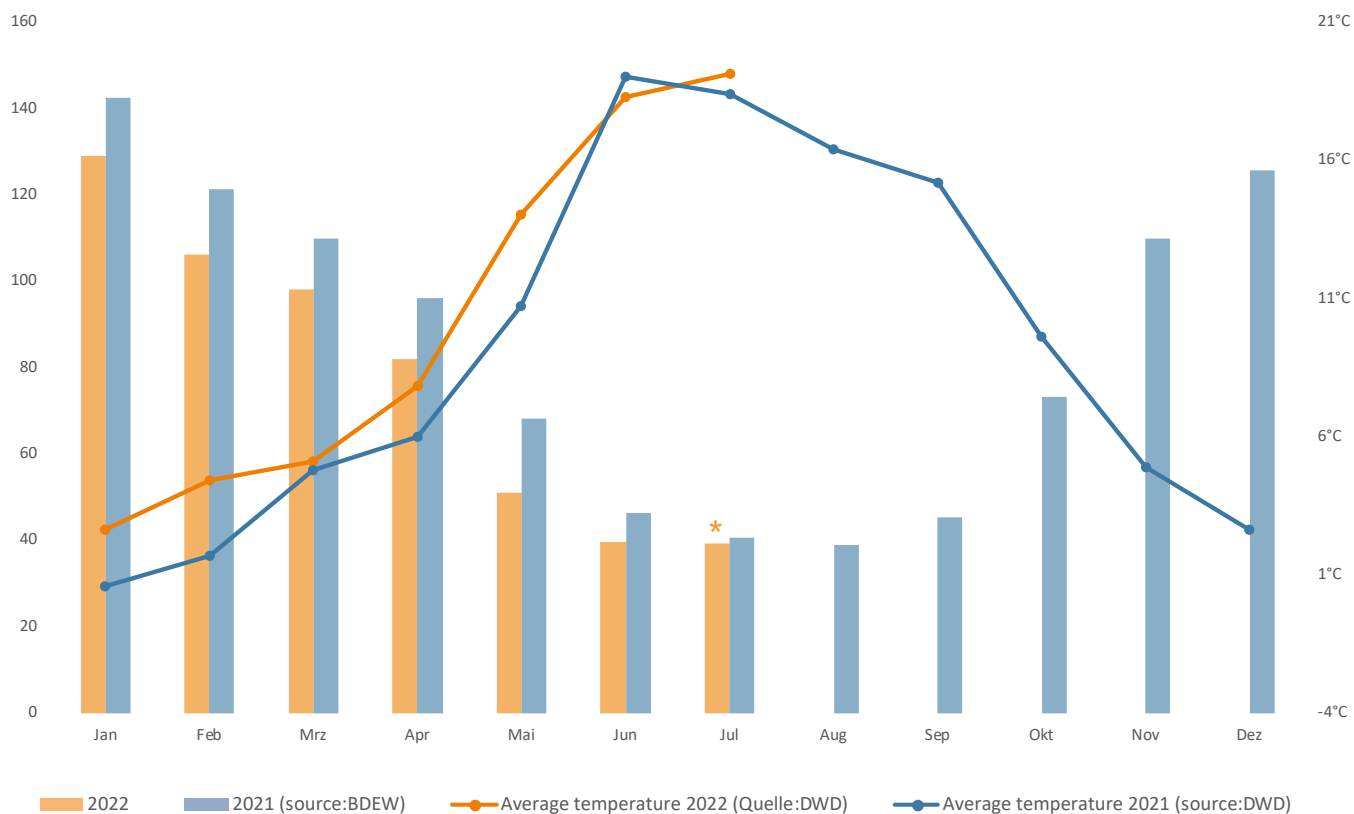

(% compared with 2018-2021 average)

From now on, the Bundesnetzagentur will be publishing industrial gas consumption statistics every Thursday. The figures are based on interval metering data provided by Trading Hub Europe. In addition to the weekly statistics, the decrease in consumption in percent will be published on a monthly basis. The Bundesnetzagentur is currently working on household gas consumption statistics for publication.

Monthly consumption of natural gas in Germany

(TWh/month)

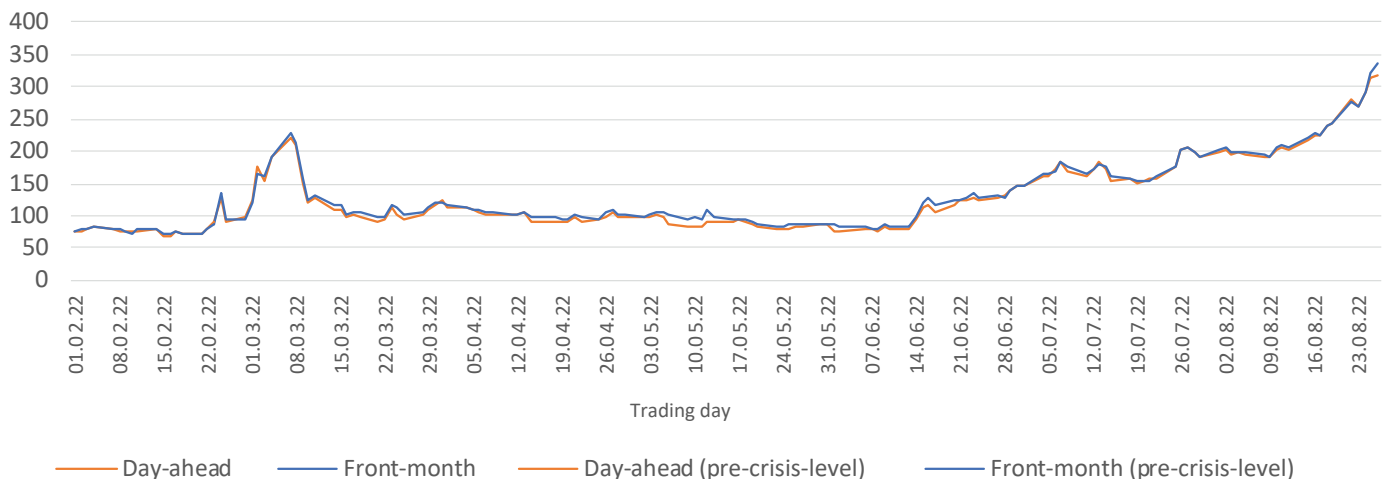

* Gas consumption is updated monthly; the figures are considered provisional until the following month.
