# Gas supply status report

As at: 1pm, 31 October 2022

- Since 23 June 2022 the alert level of the gas emergency plan has been in place.
- The situation is tense and a further worsening of the situation cannot be ruled out. The gas supply in Germany is, however, currently stable. At present, the security of supply in Germany continues to be safeguarded. The Bundesnetzagentur is monitoring the situation carefully and is in close contact with the system operators.
- Gas continues to be injected into storage. The total storage level in Germany is 98.52%. The storage level at the Rehden facility is 91.41%.
- Gas consumption in the week beginning 17 October 2022 was considerably lower than average consumption in the past four years, one of the reasons being the weather. Temperatures were 2.5°C above the annual average for the period from 2018 to 2021.
- Wholesale prices are fluctuating greatly and have fallen sharply recently. However, businesses and private consumers must adapt to significantly higher gas prices.
- The Bundesnetzagentur stresses the need to save gas. Avoiding a national gas supply emergency this winter depends on three things: cutting gas consumption by at least 20%, LNG terminals starting operation at the beginning of next year, and the winter decrease in imports and the increase in exports – which are currently at a particularly low level – being relatively small.

The charts below are from 28 October. Due to technical problems we are unable to update them at present.

## 1. Gas flows

### 1.1 Gas imports (GWh/day)

## 1.2 Gas exports (GWh/day)

## 1.3 Gas production in Germany (GWh/day)

## 2. Storage levels in Germany

### 2.1 Development of storage levels in Germany (%)

### 2.2 Gas storage levels in Germany: daily storage level and change in storage levels (percentage points)

### 3. Consumption of natural gas

#### 3.1 Gas consumption of industrial customers (weekly average) (GWh/day)

#### 3.2 Gas consumption of household and commercial customers (weekly average) (GWh/day)

#### 3.3 Gas consumption in Germany (weekly average) (GWh/day)

## 4. Gas price

### 4.1 Wholesale gas prices (€/MWh)
