## Gas supply status report

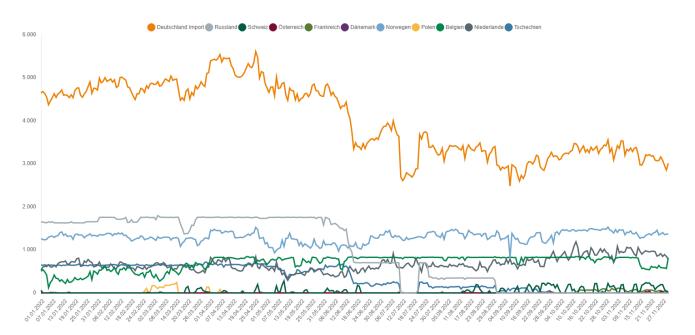

As at: 1pm, 1 December 2022

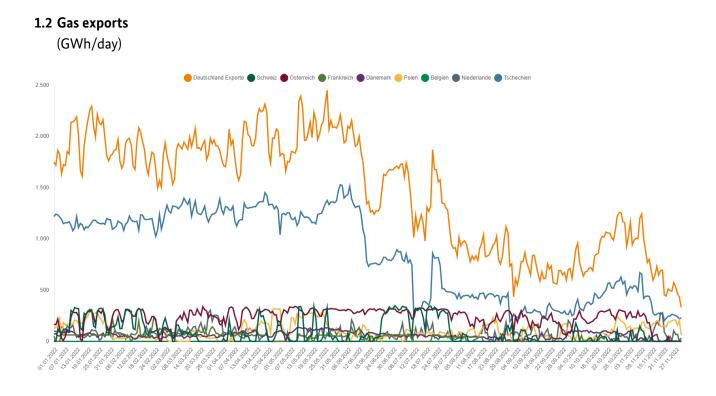

- Since 23 June 2022 the alert level of the gas emergency plan has been in place.
- The gas supply in Germany is currently stable. The security of supply is safeguarded at present. Overall, the Bundesnetzagentur still views the situation as tense and cannot rule out a further worsening of the situation. The Bundesnetzagentur is monitoring the situation carefully and is in close contact with the system operators.
- The maintenance work on the gas pipeline between the UK and Belgium ended on 30 November 2022 as planned.
- Gas is mainly being taken out of storage. The total storage level in Germany is 98.24%. The storage level at the Rehden facility is 92.58%.
- Gas consumption in the week beginning 21 November 2022 was 21% lower than average consumption in the past four years but up by 12% compared with the previous week. Temperatures were 0.5°C higher than in the previous years. The temperature-adjusted consumption was just 24.15% lower than the reference value of the past four years.
- Temperatures this week are forecast to be 0.73°C higher than the average of the past four years, so higher consumption is expected.
- Wholesale prices are fluctuating greatly and have risen again recently. Businesses and private consumers must continue to adapt to a significantly higher price level.
- The Bundesnetzagentur stresses the need to save gas. Avoiding a national gas supply emergency this winter depends on three things: cutting gas consumption by at least 20%, LNG terminals starting operation at the beginning of next year, and the winter decrease in imports and the increase in exports which are currently at a particularly low level being relatively small.

## 1. Gas flows

#### 1.1 Gas imports

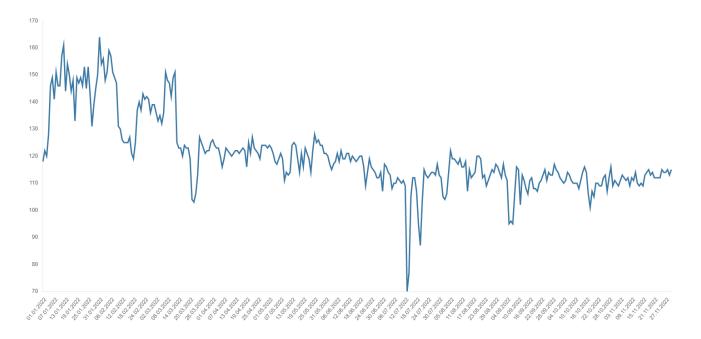

(GWh/day)

**1.3 Gas production in Germany** 

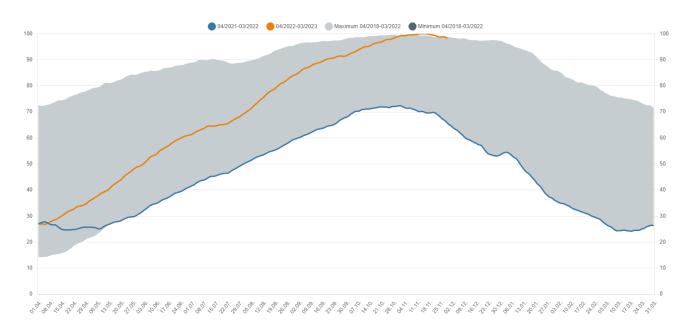

(GWh/day)

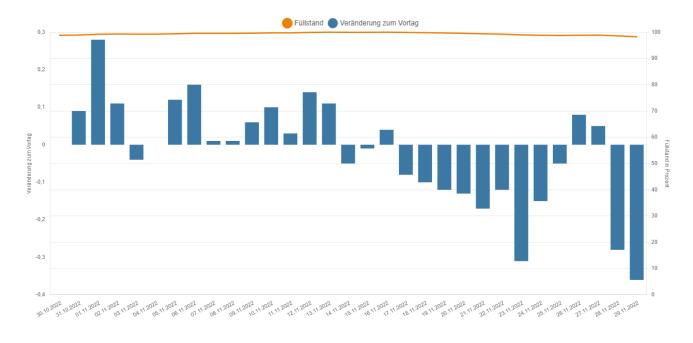

## 2. Storage levels in Germany

### 2.1 Development of storage levels in Germany

(%)

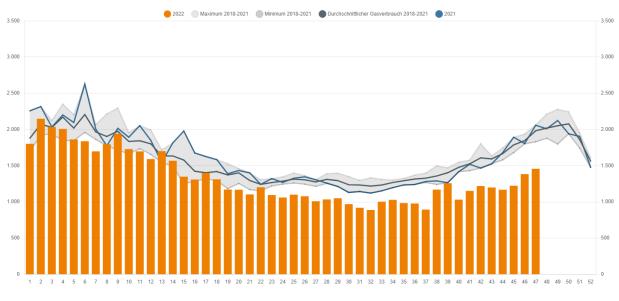

# **2.2 Gas storage levels in Germany: daily storage level and change in storage levels** (percentage points)

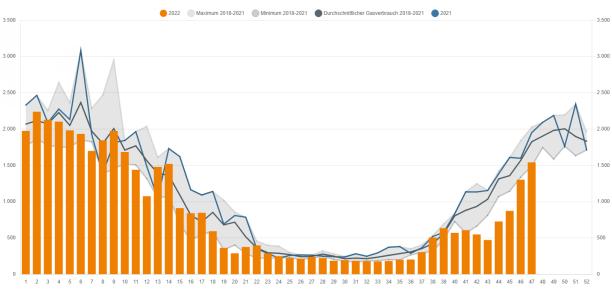

## 3. Consumption of natural gas

### 3.1 Gas consumption of industrial customers (weekly average)

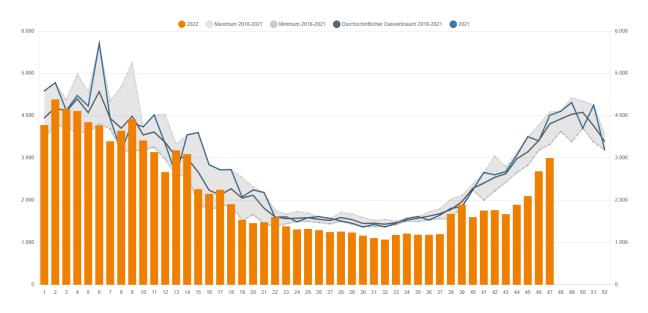

(GWh/day)

**3.2 Gas consumption of household and commercial customers (weekly average)** (GWh/day)

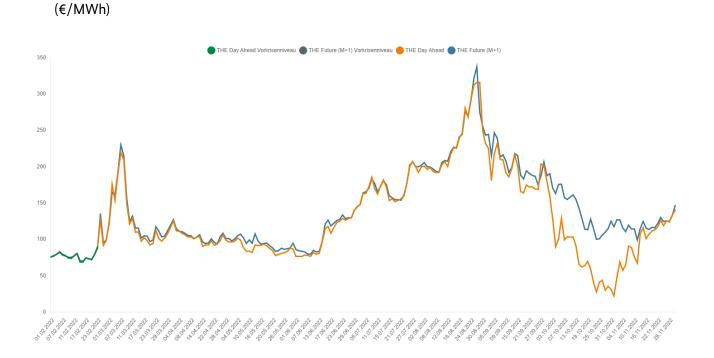

## 4. Gas price

#### 4.1 Wholesale gas prices

#### Contact
