THE WORLD FORUM ON ENERGY REGULATION (WFER VII)
REGULATING IN A TIME OF INNOVATION:
Empowered consumers, dynamic markets and sustainable infrastructure

Held once every three years, WFER is the leading international conference on energy regulation. Key energy players from all over the world gather to engage in strategic and meaningful conversations on regulatory frameworks and best practices.

Goals

Gender Perspective: To enrich the forum by including in all conversations some of the most powerful female voices in the energy sector.

Global Reach: To present a diverse and multicultural group of experts, making sure every region is represented and both developed and developing perspectives are heard.

Sectorial Balance: To include in different sessions key players from diverse backgrounds to discuss how innovations are currently transforming the fundamentals of the entire energy value chain.

Activities

The VII WFER is a unique opportunity to hear the voices of the most relevant players of the global energy industry. The forum will include the following activities:

a. Conferences
   • Keynotes
   • Plenaries
   • Concurrent sessions

b. Trainings

c. High Level Meetings

13 ICER members
3 Organizing Committees
+50 Attendant countries
